

DyeProfiler

Software for application
data

Application Area

Exhaust dyeing of cotton and other cellulosic fibres like viscose and linen

What is DyeProfiler Reactive?

DyeProfiler is software providing information about important application properties that are not always available from the manufacturers. All data have been collected based on experiments in our own lab.

Drimarene Navy H

Exhaustion

1/3 SDD 2 SDD

Benefits

Objective information

Transparent test methods

Helps to improve dye selection (compatibility, ease of application, fixation)

Contributes to reduced dye concentrations in the wastewater

Fixation

1/3 SDD 2 SDD

Wash off

Features

Comprises more than 50 popular reactive dyes

Provides exhaustion, fixation and wash-off data

Further dyes can be analysed upon request

Addition of customer-specific data possible

Available for Windows and Android

Name

Drimarene Navy HF-B
